## OBJECTIVE

---

Seeking a Software Developer position to leverage my 3 years of experience in web development and team management to build innovative and efficient applications.

## SKILLS

---

|                                      |   |
|--------------------------------------|---|
| <b>Frontend</b>                      | ReactJS, NextJS, Refine, Tailwind CSS   |
| <b>Backend</b>                       | NestJS, ExpressJS, Supabase, PostgreSQL, REST APIs, NodeJS  |
| <b>Programming Languages</b>         | TypeScript, JavaScript  |
| <b>Payment Gateway Integrations</b>  | Stripe, PayPal, CorvusPay, GoldenPay, Tap2Pay   |
| <b>Authentication &amp; Security</b> | Keycloak, Supabase Auth   |
| <b>Collaboration &amp; Tools</b>     | Git, BitBucket, Slack, JIRA, Jenkins, Docker, AWS, Figma  |
| <b>Soft Skills</b>                   | Leadership, Adaptability, Decision-Making, Team Management, Critical Thinking, Problem-Solving, Time Management |

## EXPERIENCE

---

**Associate Developer** July 2023 - Present  
Sumeru Technology Solutions *Bengaluru, IN*

- Led a 15-member cross-functional team to design, build, and scale a global CRM platform used by 15,000+ teachers and administrators across 60+ countries. Along with leading the team, I also worked as a hands-on developer, building backend services using NestJS, PostgreSQL, message queues, and developing frontend features with Next.js, Shadcn UI, and Zustand, while ensuring performance, reliability, and clean code.
- Developed configurable registration pages using Next.js, allowing admins to easily change content and user flow. Built a reusable payment gateway integration module that is used across multiple Art of Living projects and supports 100,000+ participant registrations.
- Built an internal translation management system using Supabase and JS for 60+ countries and 50+ languages, significantly reducing localization turnaround time and eliminating client dependency for the product delivery.
- Built a unified fundraising wrapper that dynamically integrates multiple campaigns using configurable data, reducing code duplication and simplifying campaign onboarding. ([Link-1](#)) ([Link-2](#)) ([Link-3](#))
- Collaborated in the rapid development of the Art of Living US website, delivering optimized Next.js components and UI/UX improvements within 48 hours. ([Link](#))

**Web Developer** Jan 2023 - June 2023  
Saptarishi Solutions *Hyderabad, IN*

- Worked on the frontend of the Art of Living Latin America CRM using ReactJS. Converted 600+ Figma designs into production-ready screens and built 15+ custom UI components, improving usability and maintaining a consistent UI/UX for over 5,000 active admin users.

## PROJECTS

---

**Snapshots.** *ReactJS — Firebase — CSS*

Built a responsive photo management app as a learning project, focusing on secure upload, preview, storage, and management of images using Firebase Storage, Realtime Database, and Authentication. Implemented basic CRUD operations and optimized image handling to improve the overall user experience. ([Link](#))

## EDUCATION

---

**B.Tech in Computer Science** 2019 - 2023  
SRKR Engineering College (GPA: 8.23) *Bhimavaram, IN*
